## Maica Compact

Laboratories require special surfaces which are able to withstand not only high wear and tear, Scratches and stains, but also the added protection of surfaces that are chemicals resistant. Compact laminates are suitable for laboratory tops as majority of common abrasive and corrosive chemicals widely used in laboratories.

Compact laminates come in a variety of pleasant colours and design the make designing a breeze.

Compact laminates add a touch of class to any environment with their immaculate clean cut lines.

## Laminates

Stockiest and Agent for Formica (Europe)

### FORMICA -High Pressure Laminate

Formica Metallic high pressure laminate is created using real metal foils over a laminate core to create stunning metallic laminates that are hard wearing but very light compared to sheet metal. Textures and patterns are applied to some Metallic laminates to create outstanding effects. A complete range of striking colours, patterns and finishes is available.

### Metallic Laminate:

High Pressure Laminates (HPL) are manufactured through fusing multiple layers of impregnated paper under high pressure and temperature to create a hard wearing, durable and hygienic surfacing material. The Formica plain colors, patterns and Wood grains ranges are high pressure laminates which are available in horizontal grade post forming (HGP) as standard. Flame-retardant HPL (VFP grade) is also available on request.

ISO 9001 : 2008 & OHSAS 18001 CERTIFIED COMPANY

## Solid Surfacing

Stockiest and Agent for Formica (Europe)

### Solid Surfacing

Formica Solid Surfacing is a new material, manufactured from a blend of polyester resins and acrylic, to which small quantities of dye pigments have been added. It can be shaped, carved and sculpted to produce stunning surfaces. The homogeneous properties of the material and almost invisible joints allow Formica Solid Surfacing to be chemical resistant and very hygienic. It is ideal for use in demanding environments such as hospitals, schools, catering, washrooms and laboratories.
